Partnership Proposal

2021

SYMPOSIUM

Research and Practice from
Australia's Growth Areas

2021 Virtual Symposium – 21 and 28 July

The National Growth Areas Alliance 2021 Symposium will showcase research and practice from Australia's Growth Areas at an online event in July.

Outer metropolitan growth area councils are innovators by necessity, developing and rapidly applying new knowledge and approaches that build suburbs and communities out of paddocks into thriving, liveable and resilient places. This work deserves to be celebrated and shared.

Being a Symposium Partner gives you the opportunity to:

- Present your growth areas-focussed research to an audience of key officials from Australia's fastest growing councils
- Connect with key decision-makers in growth areas councils through facilitated introductions by NGAA

The intimate scale of our Symposium allows for easy and extended access to an influential group of delegates from across Australia.

Our Audience

- > Key decision makers - Mayors, Councillors, CEOs and senior officers - from Australia's growth area councils
- > Executives from State and Federal government departments and national bodies

Benefits of partnering with the National Growth Areas Alliance

Partnering with NGAA provides **direct access to key decision makers** in Australia's fastest growing Local Government areas and a **unique opportunity to impact their planning, policy and future projects**.

NGAA events bring together **politicians, policy makers and industry leaders** to collaborate on positive solutions for growth areas.

Our events provide enhanced networking opportunities in an intimate setting.

About the National Growth Areas Alliance

We are a national body, representing Councils across Australia's growth areas and their five million residents. We influence and work directly with many of the country's top decision makers on matters impacting cities policy and advocate for the needs of our member councils and their communities.
